CLEANING AND MAINTENANCE

Cleaning of your Add-A-Bathroom shower or bathroom unit is simple and easy.

Regularly wash the surface of your Add-A-Bathroom product with a mild detergent in warm water using a soft sponge, as you would for washing a car. For general cleaning we suggest standard 'Bathroom Spray' type products, or simply wash with warm soapy water. Enjo style cleaning cloths also work well, follow the manufacturers instructions if using these types of cleaning products.

Abrasive cleaners or bleach based products should not be used at any time.

Do not use automatic dishwashing detergent, abrasives, bleaches, acid based chemicals or ammonia. Avoid products containing waxes or silicones on floor areas as such products may be slippery. Should you wish to polish the surfaces sometime into the future use only waxes and polishes recommended for fibreglass products and follow the instructions carefully.

Minor scuffs can be generally removed with a suitable fibreglass polish. If scuffs are a bit deeper than can be removed with polish then the area can be carefully wet rubbed with suitable 'wet type' sand paper. Be careful not to use too coarse a grade of paper, start off with a finer paper and if needed up the grit size. When the scuff is gone, work back through finer papers up to around 1200 grit or finer before finishing with a polish. If in doubt use a professional. Most bath re surfacers and repairers will be able to accommodate you.
